

RAPID CHAIN

LIGHT PAPER (V.1)

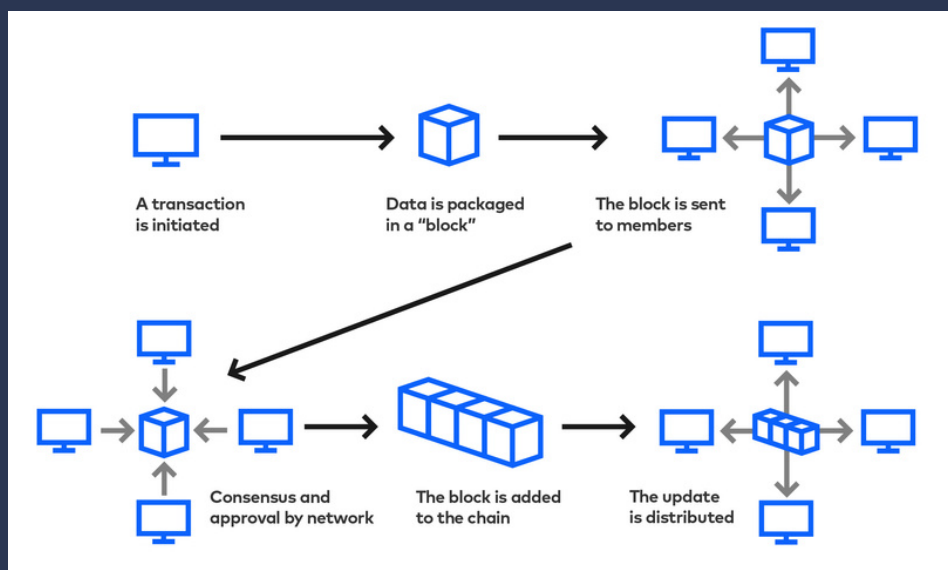

RAPID
CHAIN

Summary

Rapid Chain is optimized to serve many areas, such as the gaming industry, by offering key features such as fast and reliable transaction processes, low transaction fees, and flexibility for developers. This document outlines the token economics, deployment phases, and key features of the network.

Rapid Chain is a blockchain network developed to address current challenges in the gaming industry and provide a better experience for users. By focusing on key features such as fast and scalable transactions, low costs, and flexibility, we offer new opportunities to developers and users.

Rapid Chain Technology

High Speed Transactions

Rapid Chain has a transaction value (TPS) that is 7 times faster than BSC. This fast transaction process offers the ability to process millions of transactions instantly, ensuring a seamless experience in the gaming industry.

Low Transaction Fees

Rapid Chain is characterized by minimal network fees. Low transaction fees reduce costs for users, allowing players and developers to realize more value.

Flexibility and Modern Features

Rapid Chain has a transaction value (TPS) that is 7 times faster than BSC. This fast transaction process offers the ability to process millions of transactions instantly, ensuring a seamless experience in the gaming industry.

Tokenomics

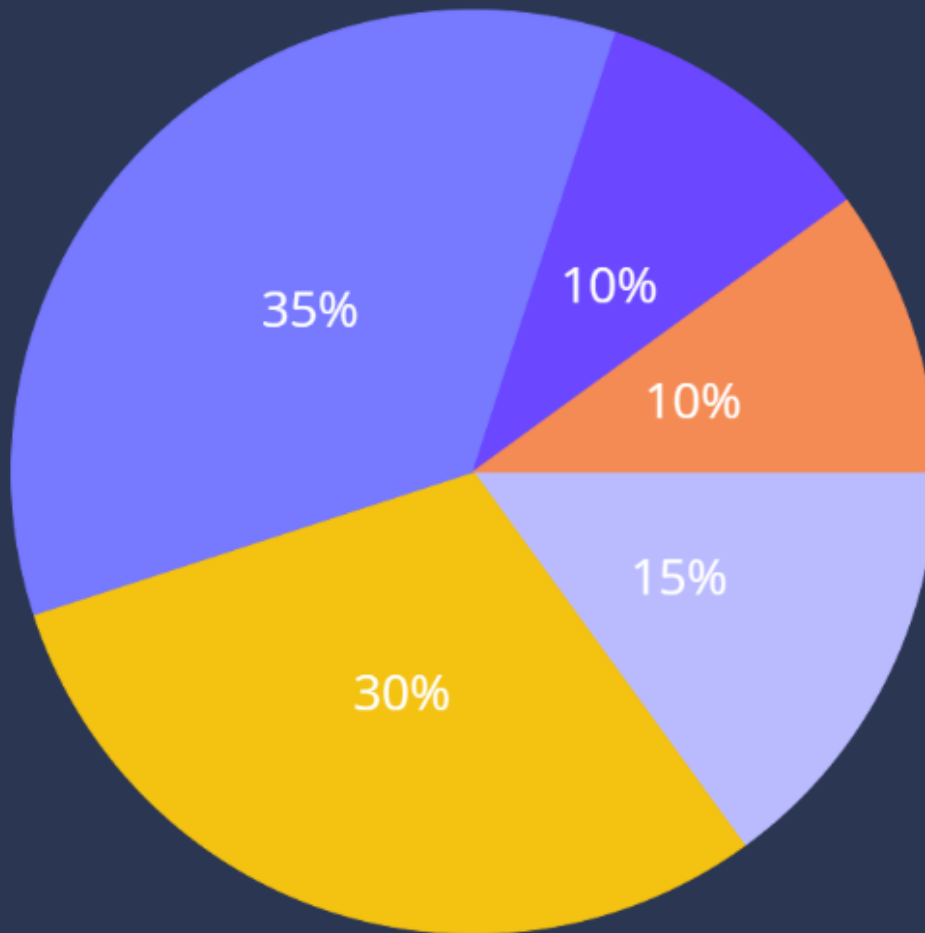

Token Name and Standard

The RAPID CHAIN token is called RAPID and uses the RAP20 token standard protocol. This standard increases the compatibility and integration of the token.

- Total Supply: **100 million RAPID**
- Amount Allocated for Burning: **15 million RAPID** (regular burning every quarter for 7 years from inception.)
- Amount Allocated for Liquidity: **35 million RAPID**
- Allocated to Ecosystem and Developers: **10 million RAPID**
- Amount Allocated for Private Sales and Pre-Sales: **30 million RAPID**
- The Rapid Foundation and funding : **10 million RAPID**
